Nobbs & Jones a leading UK Building Managements Systems manufacturer chooses IGE+XAO Group's SEE Electrical.

Sheffield, June 19th, 2008 - The complexity of today's internal building environments demands that the Building Management Systems (BMS) satisfy rigorous criteria, both in terms of performance & reliability. Nobbs & Jones' expertise within controls for heating, ventilation & air-conditioning is second to none in the industry and is trusted by some of the country's leading architects and specifiers, as well as by many market leading corporate clients.

Located in the Preston area, Nobbs & Jones' experience in BEMS spans over thirty five years. In that time, Nobbs & Jones have dealt with thousands of contracts, from small maintenance commissions to much larger installations involving complex integrated control panels over multiple locations.

As a leading independent controls company in the UK, Nobbs & Jones is constantly striving to improve its design process. As a result, Nobbs & Jones has decided to acquire an Electrical CAD (Computer-Aided Design) package and has selected after serious review IGE+XAO's SEE Electrical.

With three levels (Basic, Standard and Advanced) SEE Electrical can adapt from simple to the most complex requirements. At Nobbs & Jones, for example, some offices have been equipped with the Basic version, while other offices requiring higher level functionalities have chosen the Standard and Advanced packages.

"What we really like about SEE Electrical is its functionality and ease-of-use. It is very easy to learn and does not require any training. This was not the case with the other packages we benchmarked SEE Electrical with" declared Jason Ellwood, Applications Manager.

"We are pleased that Nobbs & Jones have selected our solution. This demonstrates the IGE+XAO Group's capability to deliver an appropriate package to our customers, thanks to our broad range of software. Our range starts with SEE Electrical LT, targeting very small business up to SEE Electrical Expert the Group's high end package" declared Jean-Marc Avezard, IGE+XAO UK Managing Director".
